Key Features

Shop From Any Product Display

With the Easy Cart module for Magento 2, customers can shop on the product page or the category page without having to reload or view any other page. No page refreshes, no added steps, no frustration.

When in Category view, Easy Cart allows your customer to add a product to their cart without going to the product page. They can configure all product options like color and size, and they can choose how many they would like to add without having to click to any other page. In short, they can focus on shopping, instead of navigating your site.

Offer Cross-Sells Upon Purchase

Once a product is added, your customer will see a success message and an offering of similar products, if you have them configured.

Streamline Your Shopping Cart

When you install Easy Cart, even your Shopping Cart page will be streamlined.

Deleting a product or changing a quantity is quick and easy. Not a moment will be lost as your Shopping Cart will update directly via Ajax.

All Magento Variation Options Supported

All native Magento color swatch functionality is supported. Your customer will be able to see product image updates upon color or style selection. The customer can even select color, size and other variations directly from the Category page. Prices and images naturally update upon selection.

Configuration

General

- **Enabled** - to enable the module select "Yes"

General

Enabled
[store view]

Yes

Mageside is a team of developers dedicated to Magento installation, support, extension creation and advanced customization. We are good at doing the heavy lifting, and there is no Magento project that is out of scope on a technical basis.

Mageside does full site conversions, Magento 2 upgrades, advanced extension development, deep systems integration and all the other fun stuff. Our code is incredibly clean, we are on first name basis with several of the core devs, and love every opportunity to create another fine expression of ecommerce. If you need the best, let us work on your next project.
