

— **Magento Extension User Guide**  
**PRICE HISTORY**  
for Magento 2

## Table of contents

### 1. [Key Features](#)

- 1.1. [Record detailed product price history](#)
- 1.2. [Track bulk price changes done via import](#)
- 1.3. [Track third-party price changes done through API calls](#)
- 1.4. [Track manual price changes done by administrator](#)
- 1.5. [Ability to filter price history of the product's](#)

### 2. [Configuration](#)

### 3. [Price History Statistics](#)

## Key Features

### **Record detailed product price history**

Once product price is changed, the detailed information is available right away on the product's page in the configuration panel.

### **Track bulk price changes done via import**

If you update products information through Magento import via csv file uploading, price attributes will be watched and the changes are recorded if changed.

### **Track third-party price changes done through API calls**

The extension tracks price changes that are committed via Magento API calls.

### **Track manual price changes done by administrator**

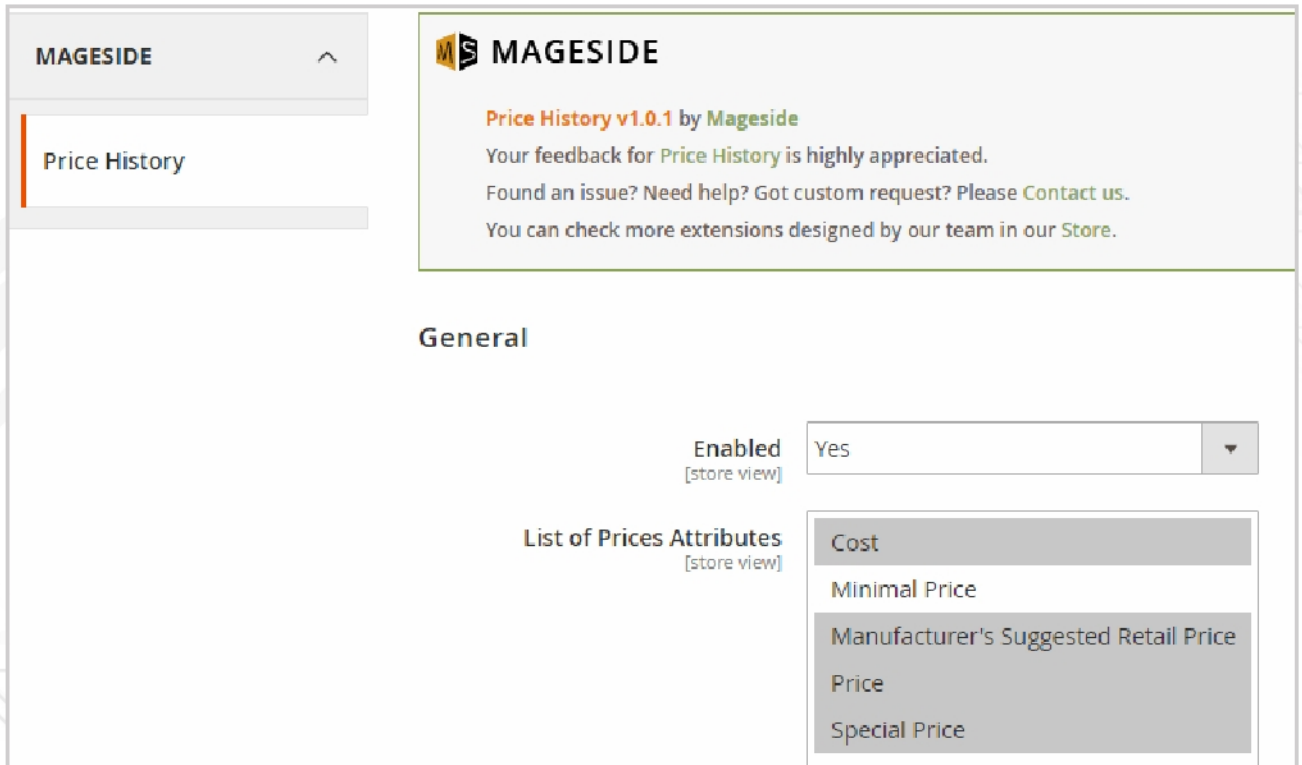

Allows you to control all changes to prices manually done by administrator accounts. Each record has information about account username who did operation.

### **Ability to filter price history of the product**

You can filter the price history according to such filter fields as date, previous price, revised price, type, changed by. It is especially helpful when a product has a long price history, so you can find it quickly.

## Configuration

- **Enabled** - to enable the extension Price History select "Yes"
- **List of Prices Attributes** - select the list of prices attributes.

The screenshot shows the configuration page for the 'Price History' extension in the MAGESIDE system. The interface includes a sidebar with the 'Price History' menu item, a main header with the MAGESIDE logo and version 'v1.0.1', and a 'General' section with two main settings:

- Enabled [store view]**: A dropdown menu set to 'Yes'.
- List of Prices Attributes [store view]**: A list of attributes including 'Cost', 'Minimal Price', 'Manufacturer's Suggested Retail Price', 'Price', and 'Special Price'.

## Price History Statistics

To see the price history of a product run to **Catalog > Select a Product > in the product settings you'll see Price History section**

In the Price History table we see such changes:

- **Date** - here is shown the date when the price change was applied
- **Type** - the type of the product price
- **Previous Price** - is shown the previous price of a product
- **Revised Price** - is shown the changed new price
- **+/-** - is shown the difference of the price
- **Changed by** - is shown by whom the product's price was changed

Date	Type	Previous Price	Revised Price	+/-	Changed By
2017-04-24 13:13:42	Special Price	15.00	12.00	-3.00	demo_price_history
2017-04-24 13:13:04	Cost	0.00	10.00	+10.00	demo_price_history
2017-04-24 13:13:04	Special Price	0.00	15.00	+15.00	demo_price_history
2017-04-24 13:12:45	Price	34.00	39.00	+5.00	demo_price_history
2017-04-24 13:12:34	Price	30.00	34.00	+4.00	demo_price_history
2017-04-24 13:12:25	Price	34.00	30.00	-4.00	demo_price_history

Also you can filter the price history of the product according to such filter fields as date, previous price, revised price, type, changed by.

Mageside is a team of developers dedicated to Magento installation, support, extension creation and advanced customization. We are good at doing the heavy lifting, and there is no Magento project that is out of scope on a technical basis.

Mageside does full site conversions, Magento 2 upgrades, advanced extension development, deep systems integration and all the other fun stuff. Our code is incredibly clean, we are on first name basis with several of the core devs, and love every opportunity to create another fine expression of ecommerce. If you need the best, let us work on your next project.
