**for Magento 2**

## Table of contents

### 1. Key Features

1.1. Automatically adds/removes products with a currently active “special price”

1.2. Database renews all sale categories

1.3. Predefined products

1.4. Shopping Options

1.5. Don't need to add/remove products manually

### 2. Configuration

3. Sale Category PRO

4. Sale Category PRO Examples

5. Showing Catalog Price Rule Products

## Key Features

### **Automatically adds/removes products with a currently active**

#### **"special price"**

The products will be removed from the sale category automatically after the expiration date of the product's sale. You just need to set up a date when the sale ends in the configuration panel.

#### **Database renews all sale categories**

Database renews all sale categories once a day by cron or you can regenerate products right from configuration panel. List of products in Sale Category PRO will be renewed automatically or manually by clicking the button of regenerating products.

#### **Predefined products**

Set up which products will be shown no matter what in Sale Category PRO. It's no matter whether a product has a special price or not. The selected product will be shown first and other products will be shown after predefined products.

#### **Shopping Options**

In Sale Category PRO are shown shopping filters now. While the products which are in Sale Category PRO are physical products now, the shopping filters appear in Sale Category PRO so a customer can find a product quickly and easily.

#### **Don't need to add/remove products manually**

Imagine how much time you should spend if hundreds of products needed to be added/removed to/from the sale category every day. With our module Sale Category PRO, you don't need anymore to do it manually. Everything will be done automatically. Install this excellent extension and save hours of your time.

## Configuration

- **Enabled** - to enable the extension select "yes";
- **Sale Category** - select sale category from the list;
- **Display Out of Stock Products** - if you don't want to show the product that are out of stock, select "No";
- **Display Products Only With Images** - if you want to display products only with images, select "yes";

### General

**Enabled**  
[store view] Yes

When you deactivate module, the current category unsign all products.

**Sale Category**  
[store view] Default Category / Test Sale Pro

When you change Sale category, the previous category unsign all products.

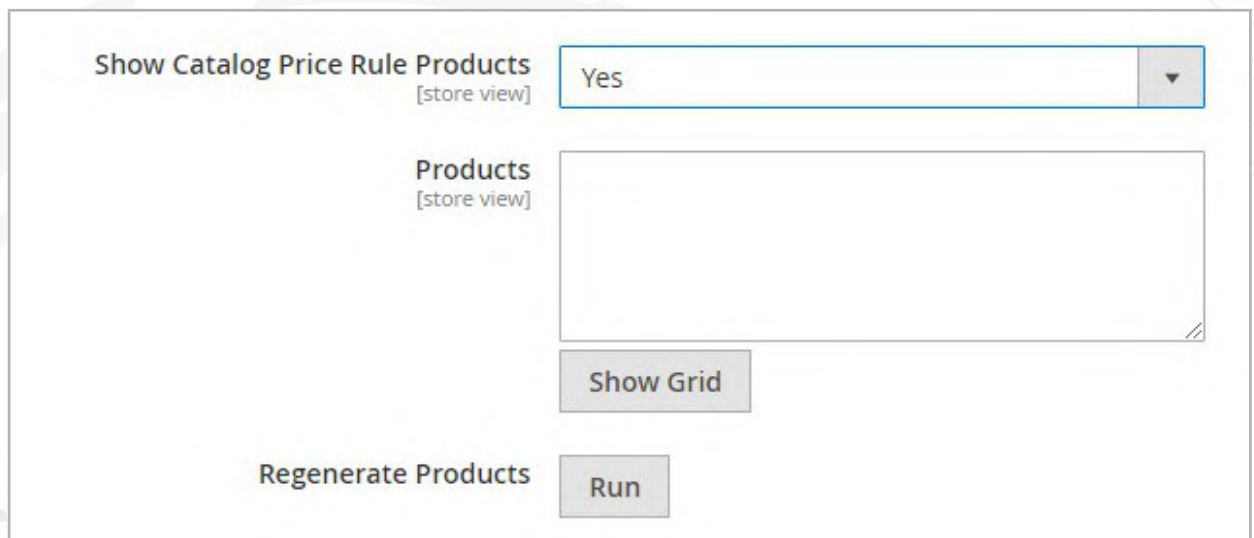

[store view]

**Display Out of Stock Products**  
[store view] No

Products will be shown only if 'Display Out of Stock Products' options is enabled.

**Display Products Only With Images**  
[store view] Yes

- **Show Catalog Price Rule Product** - to enable this option select "Yes"
- **Products** - type the SKU number of products that are predefined.  
Predefined means when products will be shown whether they have special price or not. These products will be shown no matter what and will be shown in first places. To select predefined products from the list, click "Show Grid".
- **Regenerate Products** - if you want to regenerate products click "run". Also, products regenerating products is executing once a day by cron.

Form fields and buttons:

- Show Catalog Price Rule Products** [store view]
- Products** [store view]
- Show Grid** button
- Regenerate Products**

To select predefined products from the list, click "Show Grid" > Select Products > Products will automatically appear in "Products" field.

**Products**  
[store view]

24-WG09, 24-WG02, 24-MB01, 24-MB04

## Sale Category PRO

To view products in Sale Category PRO go to **Categories > Sale PRO**  
To view products click "Products in Category".

The screenshot shows the 'Test Sale Pro' category configuration page in the Magento Admin. The page title is 'Test Sale Pro' with a notification bell icon in the top right corner. Below the title, there is a 'Store View' dropdown menu set to 'All Store Views' with a help icon. On the left side, there are two buttons: 'Add Root Category' and 'Add Subcategory'. Below these buttons are links for 'Collapse All' and 'Expand All'. A tree view of categories is shown on the left, with 'Test Sale Pro (12)' highlighted in orange. On the right side, there are three configuration options: 'Enable Category [store view]' with a toggle switch set to 'Yes', 'Include in Menu [store view]' with a toggle switch set to 'Yes', and 'Category Name [store view]' with a text input field containing 'Test Sale Pro'. Below these options are sections for 'Content' and 'Display Settings'.

The products with position "1" are predefined and always will be shown first in the Sale Category PRO. It doesn't matter whether these products have special price or not, they will be always shown.

## Sale Category PRO Examples

The first two products are predefined, so they appear first even without special price. The Sale Category PRO extension has one more awesome feature. As all products in Sale Category PRO are physical, so Shopping Options appear in this category. Now a customer can find a product easy and quickly using shopping filters.

## Showing Catalog Price Rule Products

The extension Sale Category PRO allows an admin to show products in catalog price rule. Enable the option in configuration panel, make sure you wrote everything right in the catalog price rule and the products will be shown in sale category PRO.

**We've created a Catalog Price Rules, enabled the option "Show Catalog Price Rules" in the configuration panel. The products will be shown in Sale Category PRO that are mentioned in the conditions of the rule. In this example, we've indicated in the conditions of the rule the category 4, it means gear-bags, so in the sale category PRO will be shown the products from gear category.**

Mageside is a team of developers dedicated to Magento installation, support, extension creation and advanced customization. We are good at doing the heavy lifting, and there is no Magento project that is out of scope on a technical basis.

Mageside does full site conversions, Magento 2 upgrades, advanced extension development, deep systems integration and all the other fun stuff. Our code is incredibly clean, we are on first name basis with several of the core devs, and love every opportunity to create another fine expression of ecommerce. If you need the best, let us work on your next project.
